EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Science, Minor in Mathematics

August 2023 – May 2027

- Concentration in Intelligence and People
- Coursework: Data Structures & Algorithms, Object Oriented Programming, Design & Analysis of Algorithms, SQL, Artificial Intelligence, Web Development, Linear Algebra

EXPERIENCE

Software Developer Intern

July 2025 – August 2025

Healthmap Solutions

Tampa, FL

- Developing an internal web tool with Python, React, and Django to serve as a test harness for health analytics and care coordination
- Exploring and learning about the company's migration to AWS

Software/Hardware Engineer

January 2025 – May

Experimental Flights

Atlanta, GA

- Collaborated with a Georgia Tech research team to improve the building of a quadcopter, ensure balance stability, and produce flight
- Preparing to design and code a software system for the drone, enabling autonomous navigation and package delivery during the next semester

PROJECTS

StackMentor.io | *Electron.js, React, Node.js, Redux, xterm.js, npm*

July 2025 – Present

- Building a full-stack desktop application using Electron and React for the frontend, and Node.js for backend logic, enabling users to select technology stacks and receive generated development guides
- Implementing a template system that automatically generates project scaffolds and directory set up based on user-selected stacks

QuickMap | *Node.js, React, TypeScript, HTML/CSS/JS, Google Maps API*

February 2025 – May 2025

- Designed and developed a web-based mapping application to improve the search and discovery of local activities and events
- Built a personalized activity discovery system prioritizing user preferences over default option-heavy map tools like Google Maps
- Implemented an intuitive user interface using React that enables real-time filtering and dynamic visualization of nearby activities

FitJacket | *OpenAI API, Strava API, Python with Django, SQLite, Git*

September 2024 – November 2024

- Developed a web application to help elderly and disabled users learn safe and personalized exercise with AI-assisted guidance
- Followed Agile methodology with two structured sprints, using Git and GitHub for version control and collaborative development
- Deployed the application that serves our refined user stories and use cases to drive feature design and ensure user-centered outcomes

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML/CSS, TypeScript

Frameworks: Next.js, Node.js, PyTorch, Django, Dialog Flow CX/ES, Bootstrap

Developer Tools: Git/GitHub, Google Cloud Console, Visual Studio Code, PostgreSQL, MongoDB, npm, AWS

Libraries: NumPy, Pandas, React, Spring Boot
